Terminal Disclaimer

The terminal disclaimer filed on March 5, 2003 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. Patent No. 6,367,637 has been reviewed and is NOT accepted.

The assignee has not established its ownership interest in the application, in order to support the terminal disclaimer. There is no submission in the record establishing the ownership interest by either (a) providing documentary evidence of a chain of title from the original inventor(s) to the assignee, or (b) specifying (by reel and frame number) where such documentary evidence is recorded in the Office (37 CFR 3.73(b)). Additionally, no statement specifying that the evidentiary documents have been reviewed and that, to the best of the assignee's knowledge and belief the title is in the assignee seeking to take action. 37 CFR 3.73(b).

Drawings

The proposed drawing correction and/or the proposed substitute sheets of drawings, filed on September 4, 2002 and March 5, 2003 have been approved.

Claim Rejections - 35 USC § 112

Claims 4, 5 and 24-36 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 3634

Recitations such as "two upstanding posts" on line 4 of claim 5 render the claims indefinite because it is unclear if the applicant is referring to the two upstanding posts set forth above or is attempting to set forth posts in addition to the ones set forth above. Recitations such as "extending from the top surface" on line 4 of claim 24 render the claims indefinite because it is unclear if the phrase is modifying both the front and rear surfaces or only the rear surface. Recitations such as "the elongated base structure" on line 3 of claim 25 render the claims indefinite because it is unclear which one of the two base structures set forth above the applicant is referring to. Recitations such as "a direction . . . the elongated base" on lines 26-27 of claim 29 render the claims indefinite because it is unclear if the applicant is referring to the direction set forth above or is attempting to set forth another direction in addition to the one set forth above.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 3634

Claims 4, 5 and 24-36 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1 and 12 of U.S. Patent No. 6,367,637 in view of Sharp. discloses a coupling device 30 for connecting two generally rectangular elements to one another.

It would have been obvious to one of ordinary skill in the art to provide a pair of the instrument organizers of claims 1 and 12 with a connector, as taught by Sharp, to more efficiently transport the organizers.
